PROFESSIONAL SUMMARY

Detail-oriented QA Engineer with 2 years of professional experience, including 1.8 years in QA at Techsapphire. Built and maintain a Selenium WebDriver suite in Python that validates 500+ live URLs per run and replaced ~70% of a manual regression pass. Strong command of STLC and Defect Life Cycle, with defect management in Jira, SQL data validation and API testing. Currently expanding automation coverage with Cypress and Playwright.

TECHNICAL SKILLS

Manual & Functional Testing: Functional, UI, Regression, System, Smoke, Sanity, UAT, Re-testing

Automation: Selenium WebDriver, Python, Data-driven Testing, Retry and Redirect Handling, Explicit Waits, Automated Excel Reporting

Databases: SQL Server, PostgreSQL, Test Data Management

Tools: JIRA, Postman, Git, GitHub, Docker, VS Code, Excel

Methodologies: Agile / Scrum, SDLC, STLC, Defect Life Cycle, Test Planning, Test Case Design (Boundary Value Analysis, Equivalence Partitioning), Test Coverage

Currently Upskilling: Cypress & Playwright (Automation Testing), API and database testing, and CI/CD pipeline integration

PROFESSIONAL EXPERIENCE

QA Engineer | Techsapphire

Panchkula | Jan 2025 – Present | Product: Restaurant Monitoring System and Note-taking application | Environment: Agile / Scrum

- Own the release test pass across **functional, regression and smoke** cycles for web and mobile products, working in Agile sprints.
- Intercepted **30+ critical defects** before production release across 18 months of releases.
- Built and maintain the **Restaurant Monitoring System**, a **Selenium WebDriver** suite in Python validating **500+ live URLs** per run with retry, timeout and redirect-chain handling; replaced approximately **70%** of the manual regression pass.
- Prepared test data and validated backend records with SQL queries during test execution and defect reporting.
- Automated run reporting in Excel (result, failure reason and timestamp per case), removing manual test-report preparation.
- Apply **Flutter and React Native** development experience to target rendering, lifecycle and platform-API edge cases missed by standard test plans.

Data Science Intern | Hoping Minds

Mohali, India | Jan 2024 - Jun 2024

- Built predictive machine learning models in **Python and Pandas**, achieving approximately **30% accuracy improvement** over the baseline model.
- Automated ETL pipelines, reducing manual data-processing effort and improving pipeline reliability.

PROJECTS

CropCraft - Machine Learning Crop Recommendation Service

Python, TensorFlow, Flask

- Trained a TensorFlow classifier to approximately **85% accuracy** through systematic hyperparameter search on multi-feature soil and weather data.
- Served real-time predictions over HTTP through a **Flask REST API**.

EDUCATION

B.Tech Computer Science Engineering | Chandigarh Engineering College

Aug 2020 - Aug 2024 | CGPA 8.10 / 10
