

NIKESH WALIA

QA Engineer • Automation Tester • Selenium • SQL

nikeshwalia@gmail.com | +91-62396 77566 | [linkedin.com/in/nikeshwalia](https://www.linkedin.com/in/nikeshwalia)

PROFESSIONAL SUMMARY

QA Engineer with **1.5+ years** specializing in Selenium automation, SQL validation, and cross-platform testing. Intercepted **30+ critical defects** pre-release and eliminated **70%** of manual QA effort through targeted automation. Flutter & React Native dev background surfaces platform-specific edge cases beyond conventional test plans.

PROFESSIONAL EXPERIENCE

QA Engineer | Techsapphire Solutions, Panchkula Jan 2025 – Present

- Executed **100+ manual & automated test cases**, identifying **30+ critical defects** before production release.
- Built **Selenium WebDriver** suite validating **500+ live URLs** with retry & redirect logic - cutting manual work by **70%**.
- Ensured robust test coverage across functional, regression, and smoke cycles, preventing critical production issues.
- Engineered a reusable **SQL test-data factory** - standardizing multi-environment provisioning and eliminating per-sprint setup overhead.
- Diagnosed recurring defects via **SQL root-cause analysis**- reducing reopen rate and shortening developer resolution cycles.
- Applied **Flutter / React Native** expertise to surface platform-specific edge cases missed by standard test plans.

Data Science Intern | Hoping Minds, Mohali Jan 2024 – Jun 2024

Built predictive ML models (Python, Pandas, ~**30%** accuracy gain); automated ETL pipelines, reducing manual data processing overhead.

PROJECTS

Order Meal – Automation Suite Selenium | Python | Excel

- Built a configurable Selenium-Python framework with retry, timeout, and redirect handling — scalable by design.
- Integrated auto-generated Excel reports logging pass/fail results, failure reasons, and timestamps per run.

CropCraft – ML Crop Recommendation Python | TensorFlow | Flask

- Trained TensorFlow classifier to **~85% accuracy** via systematic hyperparameter tuning on multi-feature crop data.
- Deployed real-time predictions via **Flask REST API**, enabling scalable HTTP-accessible crop recommendations.

TECHNICAL SKILLS

Testing: Selenium WebDriver, Automation & Manual Testing, Regression, Functional & Smoke Testing, Bug Tracking

Programming: Python, JavaScript, Dart (Flutter), C#

Database: SQL Server, MySQL, PostgreSQL

Tools: Git, Postman, Docker, VS Code

EDUCATION

B.Tech – Computer Science Engineering | Chandigarh Engineering College | 2020 – 2024 | CGPA: 8.10 / 10
